The ontological essence of dialogue

In the article the there are raised the important questions connected with ontological role of dialogue and its ontological contents. The author marks close dialogue's connection with values and senses, practically not studied in native psychology. Being based on the ontological ideas of philosophers-existentialists, neofeudists, representatives of humanistic psychology, and also native scientists (M.M. Bakhtin, L.S. Vigotsky, S.L. Rubinshtein and their followers), the author creates the ontological model of dialogue and shows its prognostic opportunities.

Keywords: ontology, values, senses, basic characteristics of ontology, ontological essence of the person, ontological model of dialogue.

Conflict in small group: concept, functions, forms and model

According to modern ideas there are distinguished the approaches to conflict understanding; it is designated the ratio between the conflict and contradictions, between the conflict and competition; there are generalized positive and negative functions of the conflict in group, and also there are presented several topologies of the conflict. The multivariate model of the conflict manifestation in small group is described. The levels of manifestation of this phenomenon are distinguished: interpersonal, microgroup, intermicrogroup, group conflict. Determinants, features of expressiveness and dynamics of these levels of the conflict manifestation are designated. Two kinds of the interpersonal and group conflict are established: personified and depersonified.

Keywords: small group, informal subgroup, conflict and contradiction, conflict and competition, functions and forms of conflict, levels of manifestation of conflict.

Competitiveness of the graduate of high school

The determinative factor allowing to prepare the experts meeting the requirements of modern society is the education system which purpose for today consists in formation of the competitive person demanded on a labor market and adapted for realities of modern Russian reality. But for preparing of the really highly professional, competitive worker, it is important to know what are the psychological features of the expert's formation at a stage of professional training; on development of what individual, personal qualities, properties, it is necessary to pay attention during his training. The degree of conformity of the person to requirements of profession can be considered as a level of professional suitability which is reflected in such characteristics of structure of personality as its abilities and professionally important qualities. The high level of professional suitability, high level of development of integrated characteristics of personality, in particular the competence, promotes favorable image of a young man which renders strong influence on his competitiveness and efficiency, and, hence, on success of his professional work.

Keywords: competitiveness, competitive advantages, competition, social expectations, self-determination, consciousness, subjectiveness, professional suitability.

PEDAGOGICS OF HIGH EDUCATION

Chislova A.S.

Effective application of information technologies in education of the person of culture

In the article the accent is made at new view of training in modern developed society, information society in which two of three components of training provide education and

development of person. In present conditions it is necessary to have not only well trained experts, but also brought up on the basis of best traditions of world and native culture nation. It can be carried out by means of New Information Technologies. Modern computer design, computer drawing, opportunities of multimedia allow to create highly artistic, aesthetically significant samples of the screen and, accordingly, information culture.
