Psychological characteristics of junior schoolchildren – unwilling settlers

As during the 1980–1990 there appeared a plenty of forced immigrants, this fact has put forward a problem of kompleks adaptation of these groups of people. The analysis of problems of adaptation of forced immigrants shows, that they extremely require the professional psychological help. In our opinion, the degree of expressiveness of stress of acculturaion, duration of intercultural adaptation depend on many factors among which rather essential are socially-demographic, social and specific personal features.

Key words: unwilling settler, junior schoolchild, anxiety, aggression, self-assessment.

Sense techniques in the education process

The transition to a personal sense paradigm of training creates real conditions to realize a sense-creation context. An educational sense-creation context is understood as the system of sense technologies which initiate students' sense-creation and, thus, develops a sense sphere of students (stimulating a personality development in general) and brings knowledge to the level of life and professional values.

Key words: *sense, смысл, sense-creation, technologies in the education process, psycho techniques, sense techniques, sense technologies.*

Psychological and pedagogical particularities of the secondary schools in regions after conflicts

There are specific particularities in the secondary schools of Chechenskaya Republic: war consequences, ethnic particularities, bilinguals, the level of the teachers' professionalism, the quality of the education and others. In order to reveal the particularities of the psychological environment of the secondary schools in Chechenskaya Republic the authors carried out polling by questionnaire among teachers of the primary classes.

Key words: particularities of the educational environment of Chechenskaya Republic, secondary school, teachers of the primary school, consequences of the military events.

Dzyuba E.A.

The use of modern technologies of teaching in the university

In a modern psychological pedagogical science the technologies of teaching are considered as one of the means of realizing an activity approach to the training in the class. Thanks to this approach students can be active creative subjects of the education process. Those technologies are especially interesting which allow to bring the education process to the level of personal sense of the student.

Key words: technologies in the education process, linguistic personality, value and semantic sphere of the student.
