Influence of the personal relations' contradictions on the transformation of the representations of friend and enemy

The problem «transformations of the representations of Other as Enemy and Friend and personal relations' dynamics» is touched by us in this article. Exposed, that the level of personal crisis of the relations' system determined the trend of transformations of social-psychological descriptions of representations of Other as Enemy and Friend. High level of the personal crisis of the relations' system determine the trend «emotional support by Friend, betrayal by Enemy' strengthening». Low level of the personal crisis of the relations' system determine the trend of transformations «common interests with Friend, aggression of Enemy' strengthening».

Keywords: *transformations, representations, Enemy, Friend, personal crisis of the relations' system*
