**Features of Russian entrepreneurs  
representations about the partners  
of small businesses belonging to «own»  
and «alien» ethnic group**

*The paper studies the influence on the representation of Russian entrepreneurs on business partners that they belong to “own” or “foreign” ethnic group, the study of the effect of direct or indirect experience with them. We consider the estimation of a set of personality traits that are traditionally included in the structure of representations of the entrepreneur and the combination of which indicates the degree of positive – negative image of a businessman. Comparative analysis of ratings of personal characteristics of entrepreneurs belonging to “own” and “alien” ethnic group, showed a significant effect of ethnicity on the degree of positive image of entrepreneurs.*

**Keywords:** Representation, personal characteristics, entrepreneur, an ethnic group.

#### **Psychological Analysis of Literature in the Works of E. Bobrov Followers**

*The author considers current interdisciplinary relations of psychology and the studies of literature. The method of psychoanalysis of literature has been frequently applied and showed its productivity. Hence, the analysis of E. Bobrov's and his followers' works on the psychology of literature is found extremely significant. Bobrov's traditions of the psychological analysis of literature developed in Kazan University and in Yiriev University were subsequently followed by Sretenskii in Donskoi (Northern Caucasus) universities. Those traditions were strong enough to have survived despite dramatic historical changes. They are reflected in the regional studies of Chekhov's works.*

**Keywords:** *The synthesis of psychology and literature, the history of psychology, Donskoi (Northern Caucasus, Rostov State) university, E.A. Bobrov, N.N. Sretenskii.*
