PSYCHOLOGY OF PERSONALITY

Rostova E.N.

Consciousness of personality and representation of the meaning of his life in adults

The article touched the problem of understanding the meaning of his life. Considered features of formation of self-identity. Covered the social and pedagogical aspects of religious education in Russian schools. In the process of development of self-consciousness the focus moved from the outside of the individual to its internal side. If to cultivate the moral values from the early age, the child will develop both, as a social unit and a unique personality. It is important to examine these issues, because the younger generation represents our future.

Keywords: meaning of Life, self-identity, value orientation, religion, level of self-determination.
